Education

Bachelor of Technology in Computer Science & Engineering

2023–2027

Vellore Institute of Technology, Chennai

- **Relevant Coursework:** Data Structures & Algorithms, Database Management Systems, Operating Systems, Computer Networks, Software Engineering, Machine Learning, Artificial Intelligence

Skills

- **Programming Languages:** C, C++, Java, Python, JavaScript
- **Frontend:** HTML, CSS, JavaScript, React.js
- **Backend:** Node.js, Express.js, REST APIs
- **Databases:** MySQL, MongoDB, Firebase, PostgreSQL
- **Tools & Technologies:** Git, GitHub, AWS, OCR, Postman, Vercel, Render

Experience

Full Stack AI Engineer Intern – The AI Signal

May 2026 – Present

- Developed AI-integrated web applications using React.js, Node.js, and REST APIs across multiple frontend and backend modules.
- Engineered a modular library of reusable UI components and responsive dashboards, boosting development efficiency by 30% and ensuring visual consistency..
- Implemented backend APIs for real-time data processing, AI feature integration, and cloud-based workflows.
- Optimized frontend rendering and asset loading to improve responsiveness and reduce application latency.

Projects

SmartDoc – Smart Document Expiry Reminder System

GitHub

Tech Stack: React.js, Tailwind CSS, Firebase, AWS S3, AWS Lambda, AWS SNS, OCR

- Engineered a full-stack document expiry tracking system supporting secure storage, tracking, and management of 100+ user documents.
- Automated expiry date extraction using OCR and API-based processing, reducing manual data entry effort by 75%.
- Implemented automated notification workflows that alert users 7 days before document expiry through cloud-based services.
- Integrated AWS S3, Lambda, and SNS to enable scalable serverless storage, processing, and notification automation.

Multi-Modal Emotion Recognition System

GitHub

Tech Stack: React.js, Node.js, Python, Machine Learning, OpenCV, Speech/Face Analysis

- Developed a multi-modal emotion recognition system using facial, speech and text inputs.
- Integrated 3 modalities into a single prediction pipeline for robust emotion classification.
- Built and trained models on datasets containing 10,000+ facial samples and 5,000+ voice samples.
- Achieved 85% classification accuracy through preprocessing and model integration.

Certifications

Java certified Foundation Associate- Oracle

Link

- Completed Oracle Java Foundations course covering 20+ core Java concepts including OOP, arrays, methods, and exception handling.
- Gained hands-on experience with 10+ Java APIs and core language features through practical exercises.

Positions of Responsibility

General Secretary – IEEE Photonics Society

July 2025 – Present

- Led coordination and execution of 5+ technical events, workshops, and chapter initiatives with structured planning and team management.
- Managed collaboration across 50+ members and volunteers, improving event participation and operational efficiency.

Languages

English, Hindi
